AUTUMN CATALOGUE

OF

NEW AND GENERAL

SOFT-WOODED FLORIST FLOWERS,

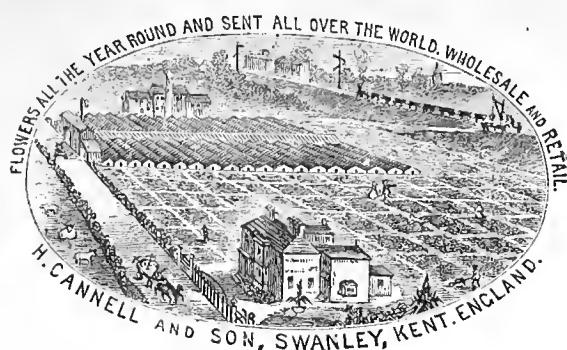

WINTER-FLOWERING PLANTS,

ROSES, BULBS, &c.

Presented to the L. H. Bailey Hortorium
by the Missouri Botanical Garden, 1972.

THE HOME OF FLOWERS:

SWANLEY, KENT.

It should be remembered that we have the largest and the finest stock and the greatest variety of soft-wooded flowering plants in the world, and we cordially invite all to come and see; our whole mind and attention is devoted to floriculture, no neighbouring or market business is ever thought of. So interesting and important is our establishment that seventeen of the Belgian School of Horticulture, on their six days' visit to England to gather information, made Swanley their first day's outing; further, the Editor of the *Gardeners' Magazine*, 12th August, says:—

"Cannell's Home for Flowers, Swanley, is fast becoming the Floral Centre of the Terrestrial Globe."

We have agents all over the world for purchasing new and good plants, &c. Never before were the various families of plants arranged and kept in such order as ours at all seasons, ready for immediate dispatch to all parts, either in pots or by post at the shortest notice and at the lowest price consistent with being well served, and the same with all Flower Seeds, particularly the choicer ones.

PRICES AT WHICH PLANTS, ROOTED CUTTINGS, AND CUTTINGS ARE SOLD, AND SENT BY EITHER SAMPLE OR PARCEL POST.

All prices herein denotes plants established in pots, and the style of packing of such should be left to us, the material only being charged for, or, if desired, the soil can be shaken away, and nearly all sent by post. The following are supplied as rooted cuttings and cuttings, viz., Ageratum, Antirrhinums, Bouvardias, Calceolarias (Shrubby), Chrysanthemums, Coleus, Dahlias, Fuchsias, Heliotropiums, Lantanas, Pansies, Pentstemons, Petunias, Phloxes, Salviyas, Tropaeolums, Verbenas, Veronicas, and Violas; plants priced 6/-, a rooted cutting would be 4d., and a cutting 2d., and so on in proportion.

Zonal and other Pelargoniums differ only in price, thus, if priced 1s., rooted cuttings will be 9d., and cuttings 6d., also sent by post, and so on in proportion to price of the plant. For all foreign postal transit (excepting Portugal, France, Holland, Spain, Belgium, and Italy), we advise well-established plants.

BOXES AND POSTAGE AT ACTUAL COST.

GREENHOUSE PLANTS, &c.

SET WITH FLOWER BUDS FOR IMMEDIATE EFFECT ALL THROUGH

--------------------------------	---------	------

As our General Catalogue (Floral Guide) will be issued early in the New Year, 1884, the prices herein quoted cease after 1st January next.

Our stock of Roses and Chrysanthemums is very large and fine, and in the best possible health for producing the finest flowers.

A remittance requested from unknown correspondents. Cash attending the order will ensure a liberal transaction. All Cheques to be crossed London and County Bank, BROMLEY, KENT. Post-office Orders to be made payable at BROMLEY, KENT, and small amounts under 5s. can be forwarded in stamps.

CANNELL & SONS' NEW & OTHER CHOICE PLANTS, 1883.

It often happens that we have sold out of rooted cuttings of some varieties, and plants are shaken out of pots to complete orders, consequently plant price must be charged.

When we publicly advertise plants in any of the gardening periodicals the usual allowance cannot be made.

OUR USUAL ALLOWANCE TO THE TRADE.

Any plants wanted and not mentioned herein, please make enquiries and we will immediately return answer.

NEW BORDER CARNATION—

Mary Morris (G. Smyth)—First Class Certificate was awarded as a decorative flower by the Floral Committee, Royal Horticultural Society, South Kensington, on 22nd August, 1882; having been previously Highly Commended at the National Carnation and Picotee Society Show, South Kensington, 25th July, 1882. Beautiful rose-pink colour, self, very highly scented, and of great size, very full, and of perfect shape; very free bloomer, and vigorous grower, having cut from one plant sixty-eight blooms; the flowers hardly ever burst, and will stand the winter out of doors 3 0

NEW SINGLE DAHLIAS—

Raised by THOS. MOORE, Esq., of the Botanic Gardens, Chelsea.

PUMILA GROUP.

Chryso, bright yellow, good form, remarkably free
Cicero, a neat deep scarlet, florets slightly reflexed
Leo, small-flowered orange-buff, distinct and pleasing in colour
Necho, pretty small-flowered pale magenta, flushed with crimson towards the base of florets
Polo, neat bright purple, florets broad and closely set.
Virgo, pure white, medium size, very free.

2s. 6d. each.

HUMILIS GROUP.

Pumilio, small clear yellow, a free-bloomer, good form.

GRACILIS GROUP.

Gracilis luteo-nana, clear yellow, of free-flowering bushy habit, very dwarf
Gracilis rubro-nana, of similar habit to the above, of a reddish scarlet, very attractive
Gracilis concinna, colour bright orange-scarlet, the model of the Single Dahlia.

Raised by W. H. CULLINGFORD, Esq.

A 1, dark ruby, very upright flower
Adonis, in the way of *Perfecta*, but of lighter colour
Burgundy, as named denotes, burgundy colour
Coquette, orange
Frederick, Dahlia colour
Feu d'Amour, scarlet
General, soldier scarlet

1s. each.

Isabel, brilliant dark claret
Jubilant, reddish scarlet
Jupiter, of a reddish colour
Patti, dark orange
Poinsettia, Poinsettia colour
Prolific, yellow
Ruby, very rich ruby colour
Vermilion, rich vermilion
Wolseley, scarlet, dwarf.

OWN raising.

Beauty , deep maroon-crimson, free and dwarf	yellow and buff at base of petals, a little beauty
George Hardwidge , rich deep crimson, medium size	Mr. S. Barlow, beautiful scarlet-crimson
Little Beauty , light magenta-rose,	Yellow Boy , deep yellow, rich orange centre.

1s. each.

DAHLIA, "Constance" or "Ariel"—

Each—s. d.

Its pure white and elegant-shaped flowers renders it complete for wreaths, crosses, and church decoration, &c., good habit and very free bloomer, grand companion flower for *Juarezii* per doz., 8s. 1 0

DWARF LOBELIAS—

One of the brightest and most cheerful plants of the summer; and when one has proved itself to far surpass all others it is doing inestimable good to let all who have a garden know it. The varieties **Swanley Blue** (awarded two First Class Certificates) and **Swanley White** possess all the good qualities needful, and their flowers, both colour and size, totally eclipse all previous ones post free 1 0

PARSLEY—

Beauty of the Parterre—We sent out for the first time the seed from half-a-dozen plants in spring, 1882, and being a perennial, we had none to offer last spring; but we are delighted now to say that we have just harvested a fine lot of the purest seed, and if sown at once will form one of the most striking objects of the garden. We have had two rows at our nursery entrance, which have arrested the attention of all visitors without hardly a single exception. It is one of the most beautiful, and the hardiest of its family. Beds edged with it are a cheering sight. Violas and Pansies contrast with it most charmingly, and we recommend all our customers to have and sow a shilling packet of seed at once. To properly develop itself it should be at least 10 inches from plant to plant, and for all purposes for which Parsley is used it will be found far superior to all others in every way.

1s. per packet.

NEW FUCHSIAS—

Beauty of Cliffe Hall	Louis Blanc	Mrs. Hooper Taylor
Ethel Fry	Lye's Rival	Mrs. King
General Lapasset	Lord Wolseley	Mr. Thos. King
Harriet Lye	Phenomenal. 2s. 6d.	Madame Jules Chrétien. 2s. 6d.
Jeanne d'Arc	Mrs. Bright	Victor Hugo.
J. J. Rousseau	Midnight	
Lamennais	Mrs. Hall	

1s. 6d. each.

NEW FUCHSIAS—

Mr. Rundell —A grand improvement on the well-known variety, <i>Earl Beaconsfield</i> ...	1 0
Mrs. Rundell —One of the most graceful and beautiful, very early flowering, First Class Certificate ...	1 0

NEW FUCHSIAS—

Paris market varieties, very floriferous and distinct.

Amelie Aubin	Madame Aubin
Marie Aubin	President Thiers.

1s. 6d. each.

ZONAL PELARGONIUMS—

Each s_i d_i

BEDDING PINK VARIETY—

Miss Blanche—Deep purplish pink, trusses large and freely produced; a fine improvement on *Mrs. Turner*; also well adapted for pot culture 10

ZONAL PELARGONIUMS (Lemoine's), DOUBLES. 1883—

Admiral Seymour —Flowers large and fine, deep amaranth-purple, base of upper petals deep orange red	1	6
Cabanel —Deep carmine, dwarf and vigorous	3	0
Carolus Duran —Rich amaranth, trusses large	3	0
Explosion —Flowers full and large, of a cinnamon colour	3	0
Jules Claretie —Violet-lake, shot carmine, flowers and trusses large	3	0
Khedive —Flowers full, light rose, the dwarfest and most floriferous of this colour	1	6
Lakanel —Violet-amaranth, suffused deeper, dwarf and very free	1	6
Sirene —Trusses large, flowers very double and fine, pure white, constant	2	0
Sir Garnet Wolsey —Of a rich salmon colour, edged with rose	2	0

SINGLES—

Dante—Flowers well formed, trusses extra large, bright purple, base of upper petals bright red ...	3. 0
Divine Comède—Bright salmon, centre rich orange-red, very floriferous	3. 0
Kleber—Flowers and trusses large, of a deep reddish-like colour, edged scarlet, base of upper petals very distinct	1. 6
L'Egypte—A very effective variety, trusses large and fine; of good form, colour deep	1. 6
Macbeth—Reddish carmine, shaded scarlet in upper petals, pure white eye	3. 0
Shakespeare—Deep magenta, suffused red, upper petals of a richer colour, white eye...	3. 0
Tel-el-Kebir—Reddish magenta, upper petals shaded scarlet, trusses and flowers large...	1. 6

DOUBLE-FLOWERED IVY-LEAVES (Lemoine). 1883—

Congo—Of a beautiful lilac-rose, very double; fine	2	0
De Brazza—Rose, deeper centre, flowers large and well formed	2	0
Jeanne d'Arc—One of the finest white varieties yet introduced	2	6
La Rosière—Flowers large, colour satiny rosy lilac	1	6

SINGLE-FLOWERED IVY-LEAF-

Masterpiece—Of a beautiful rich magenta, crimson, 16

SHOW PELARGONIUMS (Beck)—

		Each—s. d.
Britomart	Upper petals margined deep crimson, lower petals bright crimson, fine form and substance	2 0
Gloriana	Distinct and showy orange-red, feathered deep brownish maroon on a bluish ground, lower petals silvery blush; large	2 6
Gratitude (Smith)	Soft rosy lilac lower petals, upper petals deep blackish maroon, edged bright pink, white centre	3 0
Superb	Rich glowing crimson, lower petals slightly veined mahogany, upper petals deep maroon-crimson, white centre, veined lake	2 0
Thebais	Lower petals light crimson, deep blotch in upper petals, margined fiery crimson, dwarf habit	2 0

REGAL PELARGONIUM—

Gloire d'Orleans	A sport from the well-known <i>Triomphe de St. Mandé</i> ; colour of a most pleasing shade; distinct and fine...	2 6
------------------	--	-----

NEW PURE WHITE ZONAL PELARGONIUM—

Niphetos (Keynes)	Said to be the finest white in cultivation	1 6
-------------------	--	-----

CONTINENTAL VARIETIES (various raisers)—

Aurore Boreale	Hybrid nosegay, light scarlet, tinged with salmon; strong grower, size of flowers immense	2 6
Avalanche	A white bedding variety of great promise, and much used on the Continent	1 0
Fritz Goebel (Double)	Of a fiery scarlet colour, individual pips very large, vigorous habit, free	2 0
Gambetta	This stands in the same position, and equally popular throughout France and Germany as our <i>Scarlet Vesuvius</i> in England, and for warm climates it is a gem, 9s. per doz.; cuttings, 4s. per doz.	1 0
Gloire Lyonnaise	Also producing immense pips and trusses of a cherry-rose scarlet colour	3 0

PRIMULA, "Princess of Wales"—

Out of the many new varieties which have been sent out hardly a single one, in our estimation, beyond our own remains. <i>Princess of Wales</i> , now offered, from its good habit and wonderful freedom in flowering, and its lovely blush white blooms, will beyond all doubt make it a favourite with all; it is one of those lovely, attractive, and good-growing kinds, even under the roughest treatment, which will constitute it a permanent variety...	2 6
---	-----

NEW SILVER TRICOLOR—

Mrs. Miller	An improvement on the well-known <i>Dolly Varden</i> ; crimson and black zones, very even and conspicuous; quite distinct	5 0
-------------	---	-----

NEW PENTSTEMONS—

Charles Darwin	Mrs. McElroy	Rabelais
Isabey	Mrs. Pollett	Sculpteur Clésinger
Mrs. Everest	Mrs. Styles	Yan, D'Argent.
Mrs. Ingram	Mrs. Weaver	

2s. each.

NEW MIMULUS (Dean)—Awarded First Class Certificates.

Grandiflorus "Brilliant"	Bearing very large and finely formed flowers of an intense bright blood-crimson colour; very free	1 0
Grandiflorus "Novelty" (<i>Hose-in-Hose</i>)	Also a vigorous-growing variety, bearing large "hose-in-hose" flowers, the foremost pale gold dashed with amber and orange, spotted crimson; the rear flower reddish orange, margined gold, and heavily spotted	1 0

NEW HYBRID MUSKS—Awarded First Class Certificates.

Each—s. d.

Moschatus grandiflorus—Flowers large, pure yellow, fine shape, and produced with great freedom. This makes an excellent bedding plant, and is the best substitute for the yellow Calceolaria ever offered 1 0

Moschatus rubrum—Reddish buff, decided in colour and freely produced; flowers large; a remarkable novelty 1 0

TROPÆOLUM—

Bicolor fl. pl.—Light clear orange-scarlet, striped and splashed orange, free and distinct 1 0

Gloire de Bordeaux—Flowers large and double, and produced in abundance, of an intense orange-scarlet colour 1 0

IMPATIENS—

Sultani—Producing Balsam-like flowers of a deep carmine colour, beautiful green foliage 0 9

Sultani alba—Equally as pretty, but producing white flowers 1 0

STREPTOSOLEN—

Jamesoni—Of easy culture, and producing large trusses of flowers of a deep orange, passing to a rich scarlet-crimson colour, and produced in abundance from March until July 1 6

SAXIFRAGA—

Sarmentosa superba tricolor—A very pretty and effective basket plant, having the appearance of a small but neat tricolor Pelargonium; for baskets and other purposes a gem 2 6

CENTROPOGON—

Surinamensis—A pretty and useful flowering greenhouse plant for the winter and early spring 1 0

CANNAS—

Ehmanni—Beautiful green foliage, flowers large and of good form, of a rich rosy lake colour, this and the following variety for the greenhouse during the winter and spring are both acquisitions 2 0

Noutoni—Flowers large, and of fine form and substance, deep reddish crimson, very free 3 6

ASPARAGUS—

Plumosus—Its pretty feathery growths are extremely useful for cutting for decoration, good plants 3 6

SIBTHORPIA—

Europæa variegata—A splendid little plant for the rockery in conservatories, foliage small 2 0

HELIOTROPIUMS—

Purple and Gold—This variety when placed in heat the foliage becomes of a bright golden colour, light purple flowers 1 0

Albert Delaux—A vigorous and distinct variety, being distinctly marbled with yellow 1 0

LIBONIA—

floribunda variegata 1 6

We never distress our stock with auctions, therefore we have immense collections of everything mentioned herein, and can serve you well, and hope to be favoured with your orders.

STRAWBERRIES.

The fact of our being located in the midst of hundreds of acres of all the best Strawberries and Raspberries enables us to offer fine plants, and good sure cropping kinds, at the lowest prices.

The following if planted at once will produce a crop next year.

Special Prices for large quantities.

Those marked thus (⊕) CANNELL & SONS recommend to give a continual supply of fruit from a month to six weeks out of doors.

⊕ ALL THE BEST KENTISH RASPBERRIES—Prices, &c., on application.

SPRING AND FLOWERS.

If the voice of Spring be not just yet much heard in the woods, the age of Spring has begun to peep on us at least from the ascending Sun. The time of sowing and of planting, and all the busy work of the gardens and the fields is at hand, and will give us in a week or two the first substantial evidence that spring-time is declaring itself. We cannot possibly commend to all our readers a better companion of the Spring than the *Floral Catalogue* of Messrs. Cannell & Sons, the "Home of Flowers," Swanley, Kent. It is impossible, indeed, for any one to know what is going on in this extensive department of affairs without some manual of this kind, and as Messrs. Cannell & Sons spare no expense, whether in the letterpress and illustrations, to give a full account, their Catalogue is really a most valuable document for any one to have at this period of the year. The list of flowers and flower seeds, with their prices, and 300 descriptive plates of the most rare or favourite kinds, is completely exhaustive. The inquirer will find many new kinds in all the various families which have been coming forward and making great mark in the shows and exhibitions, and the propagating of which in their highest quality Messrs. Cannell & Sons have taken under their careful protection. Such is the priceless kind of information obtained from Messrs. Cannell & Sons through the whole immense catalogue of flowers, and when they speak strongly in commendation, we need scarcely add that is always on the highest practical authority. The *Home of Flowers* was perhaps never in more admirable condition than this season. The professional skill and extraordinary care in selection of flower seeds for which this firm enjoys such high repute, could not have a grander or more conclusive illustration than in the flowers of every kind, and suited to every climate, which they grow under their own hand in their own pleasant English soil.—*Christian Union, Spring Number, 1883.*

THE undermentioned persons having apparently removed from their former residences, as given below, H. CANNELL & SON would feel greatly obliged if any of the readers of the "Guide" and "Autumn Catalogue," who may happen to know their present addresses, will kindly forward the same to them. They will gladly pay postage, &c.

CHRYSANTHEMUMS.

Never were Chrysanthemums so generally grown, and to such perfection, as now. Shows are springing up in nearly every town; and to meet the demand for plants and cuttings, we have made extraordinary exertions to enlarge our stock, so that we may execute orders the same day as received. We have devoted quite an acre to their production, and, in fact, allotted a separate portion of our Nursery to their special culture; and, as near as they can be counted, not less than 8,000 plants are in 4-inch pots for immediate sale. There can be no hesitation about their being correctly named—we have a large house (150 feet) specially for them to develop their blooms. At the proper season we have a display consisting of all the best and most distinct kinds, and forms unquestionably the best and most complete collection of this family ever brought together, and will, of course, include, like all our collections of florist flowers, the original species down to the latest new and improved kinds. For comparison throughout November, this will be found such an opportunity as never before offered for all lovers of this genus. For our brief cultural directions (see *Floral Guide*), if carried out, will enable one to grow plants as represented by the engraving.

NEW VARIETIES, 1883—JAPANESE.

Each—s. d.

Ceres , delicate pink, changing to pure white, large flowers, broad petals	2	6
Duchess of Albany , petals long, inclining to twist, bright orange-buff, grand	3	6
F. A. Davis , long petals, inclining to twist, dark crimson, with golden back	2	6
M. Brun , fine mauve, double and full, high centre, large	2	6
M. Desbreaux , a deep chestnut-red, extra large	2	6

The above have been awarded First Class Certificates.

NEW JAPANESE VARIETIES—

Angèle , flowers small, deep lilac-rose, reverse of petals silver	
Boule d'Argent , flowers small, purplish amaranth, centre light	
Brunette , very large, rusty-red, brownish centre, tipped yellow	
Elise , flowers twisted, silvery lilac.	

Helvétie , flowers small, amaranth-carmine, light centre

 235.*Perle des Beautés
 240.*Robert Bruce
 *Reverie
 Triomphe du Nord
 246.*Undie.

LARGE-FLOWERING ANEMONE OR QUILLED ASTER-LIKE CHRYSANTHEMUMS—

A stand of these, when well-grown, has a most unique and beautiful appearance, and if once seen they would be grown by hundreds; and the same with Pompon Anemone.

The selection here made includes the best of this somewhat limited but very beautiful class. They should be exhibited in single flowers.

250.*Acquisition
 251. Atargulle. 9d.
 253.*Emperor
 254.*Empress. 9d.

 Graem
 349. Zobeide

All those not priced, 6d. each; cuttings, 2d. each.

POMPONS FOR SPECIMEN GROWING, EITHER AS BUSH OR PYRAMIDS—

The sorts here selected are varieties characterised by good and ample leafage, early bloom, and sorts that do not show an eye, the latter fault being one very conspicuous at exhibitions. The varieties here enumerated have been among the First Prizes at all the great Shows.

FIMBRIATED CHRYSANTHEMUMS—

Hybrid Pompon section, each beautifully and regularly scalloped, and gives us a new class, and when known will be as general in every collection as *Madame Marthè*.

352. Adele Presette	359.*Marabout	367. Tissandier
354. Fremy	360.*Monsieur Hoste	368. Toussaint L'Ouverture
355. Fimbriatum. 1s. each	362. Princess Meletia	369. Toussaint Maurisot
357. Monsieur Camille	364. Sir Richard Wallace	
358. Mr. Holmes	365. Souvenir de Jersey	

SMALL WELL-FORMED FLOWERS—

371.*Adonis	381.*†La Vogue	389. Modele

24th August, 1883.

Parcels Post.—The plants and cuttings received from you arrived in first-rate condition by parcels post, it will be a wonderful advantage to you and the public.

EARLY-FLOWERING CHRYSANTHEMUMS—

These must take a much higher stand for garden decoration than they have hitherto done, for they are both pretty and very useful—at Hampton Court *Madame Desgrange* has produced quite a sensational bed—and for harvest festival decorations are most valuable, producing an abundance of flowers just before frost, and for all northern parts they must prove very valuable and far more serviceable than the later kinds, which are of little value for outdoor decoration.

DAISIES.

Few persons—gardeners in particular—have the slightest idea of the effect these have (when planted in lines like other plants) and their easy management, or they would fill their beds every autumn, and so have a grand display with half the trouble, and equally as satisfactory as the ordinary summer plants. With these, and a few Violas and Primulas, every lawn can be made gay, comparatively speaking, for nearly all the spring and early summer months.

We have been increasing these until we have half-an-acre, and can therefore offer good plants at the following prices:—

					Per doz.	Each.
					s. d.	s. d.
Red—Ordinary bedding	per 100, 7s.	1 6
White—Ordinary bedding	" 7s.	1 6
Pink Beauty	" 8s.	2 0
Mottled Red and White (<i>Victoria</i>)—Very large	" 7s.	1 6
Rob Roy—intense red	10s.	—
Hen and Chickens, another of the old curiosities, and seldom seen, highly interesting, the peculiar growth	4 0	9 6

DEUTZIA—

graeilis, plants well set with flower buds from ground 4s., 6s., & 8 0

ECHEVERIA—

PRIMULAS.

Our collection, solely for seeding purposes, is the choicest ever brought together, and are throughout the winter a sight never to be forgotten the new kinds possess such brilliancy of colour that they totally eclipse the older ordinary rose-coloured varieties; were it needed we could append numerous extracts from every Horticultural Journal, and other testimonials. (See Reports of the Royal Horticultural Floral Committee Meetings.)

Our two houses, 100 feet each, are a grand sight all the winter and spring.

PLANTS IN FLOWER.

From Official Description of the Great Flower Show at Ghent, 15th to 22nd April, 1883.—“First let us say something about the English Horticulture. The Double Cinerarias of Messrs. Cannell & Sons, Swanley, excited the astonishment of all amateurs. It was very easy to decide these plants to be first-rate novelties. Their elegant double blooms are of a dark purple colour, and charming to gaze upon. They formed in the large Exhibition Hall a splendid group, together with the Double Mignonettes, a curiosity, with blooms of a whitish colour.”

DOUBLE PRIMULAS.

Per doz. s. d.	Each. s. d.
-------------------	----------------

<i>Alba plena</i> , small, 8s. per doz.; flowering, 1s. & 1s. 6d. each	These rank amongst the most desirable of plants for the decoration of the conservatory or greenhouse during the autumn, winter and spring months, and where cut flowers are in general request, these are of great value	12s., 18s. & 24	0

RUBUS ROSÆFOLIUS var. CORONARIUS, or BRIDAL ROSE—

A small shrub, somewhat resembling a miniature Raspberry tree, producing a quantity of pure white flowers in a warm greenhouse all through the winter. Where cut flowers are in demand to enliven the long and dull season it is very valuable ... 7 0 0 9

WINTER-FLOWERING SALVIAS.

Perhaps at no time of the year do gardeners find it more difficult to keep up a display of flowers than about the commencement of October, but if the following Salviæs were once seen, and persons were determined to grow them, there would be no more scarcity of either the most intense blue, scarlet, purple-rose, and several other intermediate colours, than there is of having in November the conservatory full of Chrysanthemums, and in fact not nearly so much trouble, for Salviæs are much easier grown and even propagated.

GREENHOUSE VARIETIES.

1. **Splendens Bruanti**—Raised in France, much dwarfer and its flowers much brighter than the old variety, and produced in greater abundance; in the south of France and Italy it is highly valued. What enhances its value and beauty is its elegant foliage of a pleasing Fern-like colour. 1s.
2. **Pitcheri**—A very beautiful herbaceous Salvia, with branching stems, 2 to 3 feet in height. Certainly one of the most desirable plants in cultivation, colour beautiful azure-blue, producing a quantity of flowers all the autumn. 1s.
3. **Angustifolia**—Producing larger flowers than *Pitcheri*, but not in such compact trusses.
4. **Betheli**—Rose, shaded white, both the flowers and foliage are most lovely. 1s.
5. **Rutilans (Apple-scented)**—Growth neat and graceful either before or after blooming, and its foliage is most delightfully fragrant, producing large quantities of very pretty neat spikes of flowers of a most lovely magenta colour, for general purposes a most invaluable plant. 1s.
6. **Mons. Issanchou**—Pnre white, bracts cream colour, beautifully and regularly flaked with bright scarlet; good habit, free-flowering, and one of the most striking and attractive in this family. 1s.
7. **Splendens**—The old variety, which is well known.

Flowering plants, 2s. each.

“EXPOSITION D'HORTICULTURE DE LA SOCIÉTÉ ROYALE LINNÉENNE DE BRUXELLES.—At the Exhibition of this Society at Brussels, on Sunday last, Messrs. Cannell, of Swanley, received the City of Brussels Medal for their superb collection of cut flowers of Dahlias and Zonal Pelargoniums, and His Majesty, who was present on the occasion, expressed admiration for the manner in which this fine collection had travelled so far in so fresh and life-like a condition. There was nothing in the Show in the Cut Flower way equal to this collection, and Messrs. Cannell may be congratulated on their success in this special florist business, to which they are so devoted.”—*Gardeners' Chronicle*, 25th August, 1883.

7. **Hoveyi** or **Ianthina**—Colour a distinct purple, producing spikes of flower in great quantities and rather of a tall growth, most telling amongst the others. 1s. each.
8. **Leucantha (barbata)**—Has a very woolly appearance, base of tubes rosy mauve, upper part of tubes pure white, long deep green leaves. 1s. each.
9. **Coccinea grandiflora**—Deep reddish salmon, flowers somewhat resembling the shape of *Salvia Pitcheri*, and of a dwarf but branching habit. 1s. each.
10. **Albo-cerulea**—One of the most beautiful, of a dwarfish habit, long slender leaves of a deep green. 1s. each.
11. **Gesneræflora**—Somewhat resembling the Gesnera, bright scarlet.
12. **Elegans**.
13. **Grahami**.
14. **Heeri**—Red, shaded orange, habit very slender.
15. **Gondotti**—Flowers small, of a deep crimson, tinted purple, lower lip striped with white.

GARDEN VARIETIES.

16. **Fulgens**—Glowing scarlet flowers.
17. **Farinacea**—A most charming and pleasing blue, grand for cut flowers. Sow seed in March.
18. **Patens**—A beautiful bright blue flower, for borders or centres of beds a very handsome and useful variety. 6d. to 1s. each.
19. **Patens alba**—Pure white, in all other respects identical with *Patens*. 1s. each.
20. **Tricolor**—White tube and mouth, with its lower segment scarlet and upper lip purple-rose, colours beautifully defined, and its neat small habit renders it a gem.

OTHER VARIETIES.

21. <i>Amabilis</i>	27. <i>Interrupta</i>
22. <i>Cacalifolia</i> , scarlet	28. <i>Porphyrantha</i> , flowers very small, deep pink
23. <i>Candelabrum</i>	29. <i>Schimperi</i>
24. <i>Chamœdryoides</i> , dark blue	30. <i>Lantanifolia</i>
25. <i>Confertifolia</i>	31. <i>Microphylla</i>

"Mr. Cannell, of Swanley, made a sensation at the recent Exhibition of the Linnéenne Society of Brussels by showing cut flowers of Dahlias and Pelargoniums in the same effective manner in which he has often presented them at South Kensington, the Crystal Palace, and other centres of horticultural activity. The flowers were still fresh, and in their fullest beauty, after their long journey in hot dry weather, and the surprise and delight they created may be measured by the fact that the King sent for Mr. Cannell to congratulate him on the novelty and splendour of the display. Another result was the Medal of the City of Brussels was awarded to Mr. Cannell by acclamation."—*Gardeners' Magazine*, September 1st, 1883.

VIOLETS.

We grow an acre of Violets, and many thousands in pots, all of which are in the best possible health and condition to flower all the winter.

S I N G L E V I O L E T S.

ALL IN LARGE CLUMPS.

Packing and Insurance in addition.

"We were shown to-day by Mr. T. Ireland an interesting object in the way of a package of Pelargonium plants, which he has just received through the post per San Francisco mail. They were sent out to order by Messrs. H. Cannell & Sons, of Swanley, Kent, who have perfected a process for sending living plants to any distance without their growth being checked to any great extent. The plants are packed in an ingenious way, so as to prevent them being injured, and were delivered in first-rate condition. An interesting feature of the affair, and a sure proof of the success of the experiment, lies in the fact that Mr. Ireland's plants have thrown out young shoots during the passage out. This should encourage our floriculturists to procure new or rare plants from home."—*Evening Star, Dunedin, New Zealand, May 30th, 1883.*

THE BEST HARDY HERBACEOUS AND PERENNIAL PLANTS.

In the wide range of hardy plants, consisting of several thousand species and varieties, some mere weeds, the following will be found all choice and most telling useful kinds, and such as should be in every garden. They are selected with the greatest care, and we think none choiceer can be recommended. We have well-established plants, such as will travel with safety to all parts of the world, and give satisfaction.

— GLAUCESCENS, bright scarlet and orange, one of the best 9d. & 1 0		— AMETHYSTINA, handsome border plants 0 9
TROLLIUS, in variety, bearing many large globular flowers, varying from creamy white to deep orange 6d. & 1 0		VINCA, single blue 0 9
TUSSILAGO FRAGRANS (Winter Heliotrope), very fragrant 0 6		— double 0 9
— VARIEGATA, very pretty and effective, strong plants 1 0		VITTADINIA AUSTRALIS (New Holland Daisy), a small much branched spreading perennial, forming neat little bushes, covered with daisy-like flowers ... 0 6
VALERIANA PHU AUREA, bright golden foliage during the spring months ... 0 9		VIOLA TRICOLOR AND ODORATA, for full list, see <i>Floral Guide</i> .
VERBENA VENOSA, rich bluish violet flowers, fine for summer bedding... ... 0 6		WEIGELA AMABILIS LOOYMANSII AUREA, AND GLOIRE DE BOSQUET, very pretty and useful 1s. & 1 6

Collection of 100 useful Border Plants, flowering at various seasons, 30s. & 50s.

„	Spring Flowering Plants, 12 varieties, 9s.
„	„ „ „ „ 25 „ 16s.
„	„ „ „ „ 50 „ 30s.
„	Autumn Flowering Perennials, 12 varieties, 6s. to 15s.
„	„ „ „ „ 25 „ 12s. to 30s.
„	„ „ „ „ 50 „ 40s. to 80s.

ROSES.

When they are to be placed out singly on lawns, a hole should be made two feet deep, and large enough to contain a good wheelbarrowful of compost, two-thirds of which should be strong turf or loam from an old pasture, and one-third of well decomposed animal manure. When beds are to be planted, the ground should be thoroughly trenched eighteen to twenty-four inches deep, as the nature of the soil will admit, intermixing some of the above compost. If this be done well, the beds will last several years, with occasionally a dressing of manure.

If a piece of ground is set apart for the exclusive cultivation of Roses, the most open situation should be selected: if wet, it should be drained well; this done, the ground should be trenched the depth as recommended above; the beds may then be formed according to taste and circumstances. November is the best month for transplanting, although with care they will do well up to the middle of March. About the first week in March for Hybrid Perpetuals, and the last week in April for Tea Roses, would be the best time to prune.

In pruning, if they grow vigorous and thick, some shoots should be cut out entirely, and others left long, varying from six to eighteen inches, in proportion to their growth; the moderate growers should be pruned back close, say from two to three buds to six inches.

 Buds averaging from 2d. to 3d. each; new kinds in proportion to the prices quoted for trees.

PRICES OF ROSES.

When the selection is left to H. Cannell & Sons.

Standards and Half-Standards, best sorts, and well varied, 15s. to 20s. per dozen.

Dwarfs, extra strong good varieties, 6s. to 9s. per dozen.

Amateurs selecting their own are respectfully requested to add to their orders a few supplementary sorts, lest by previous orders the stock of any particular variety should be exhausted, this is especially necessary as the season advances.

SPECIAL NOTICE.

We wish to draw attention to our stock of *Roses*, both *Standards* and *Dwarfs*, *Standards* in particular. Two acres, unquestionably the finest ever seen, and all purchasers must be delighted with them.

HYBRID PERPETUALS.

IN BLOOM FROM JUNE UNTIL NOVEMBER.

As dwarfs, for pot culture, they are quite unequalled, flowering with certainty when forced. With a careful selection of sorts, and proper management, they may be kept in bloom every month in the year.

The kinds marked thus (*) are of free growth and well suited for planting in the vicinity of large towns. Those suitable to grow as Pillar Roses, P.

Those marked (e) may safely be depended upon for exhibition purposes.

N.B.—Where Price of Standard or Dwarf is not affixed, the Variety cannot be supplied as such this season.

All the New Roses at the usual price. Send card for particulars.

From Mr. WM. THOS. HAYES, ELMWOOD, SUDBURY, HARROW.

I beg to say that the Roses arrived safely, and have given great satisfaction.

From Mr. JAMES METHIVEN, SOUTHOVER HALL, BURWASH, SUSSEX, 21st January, 1882.

The Roses arrived quite safe; I am highly pleased with your selection.

From Mr. CHARLES PRICE, 10, MILL ROAD, TAIBAOH, February 18th, 1882.

The Roses are very nice plants, and your packing is most excellent. I must also give you a word of praise for the splendid Hyacinths and Tulips I had from you; they are now in flower and magnificent.

NEW YEAR'S PRESENTS OF SPLENDID PLANTS

JUST COMING INTO FLOWER.

DUTCH AND OTHER BULBS.

Our Patrons and Friends will, we are sure, be glad to hear that we have a Traveller who was employed for some time in our Nursery, and who is well acquainted with English, French, and German, now on the Continent, purchasing all the best Flowers that are favoured in England; many new and scarce ones have come to hand. Dutch Bulbs and Lily of the Valley, &c., he has selected with the greatest care to secure the best, consequently, we have good reason to assure our customers that those we now offer cannot be surpassed either in quality or price.

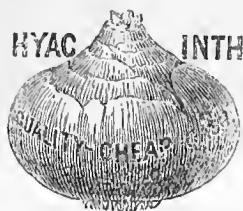

BARE BEDS.

Immediately made beautiful at all seasons of the year.

We grow several acres of Spring and Summer Bedding Plants, and can supply really good strong plants. Give a rough sketch of your beds, with length and breadth, and the most suitable plants will be sent, with particulars how to plant. See H. C. & Sons' *Floral Guide*.

DUTCH BULBS, &c.

CULTURE OF THE HYACINTH.

HYACINTHS IN POTS.—Good rich light soil, rich loam full of fibre, well-decayed cow-manure, one-third of each, and the remainder of leaf-mould and sea sand in equal proportions. To stand a month or more before being required. Five-inch pots are a good size to use, although smaller will do. In potting, leave the top of the bulb level with the surface of the soil, which should be moderately moist, and should not be pressed too firmly. After potting place them on a bed of ashes, cocoanut fibre refuse, tan, or coarse sand, and cover them with the same material to a depth of four or five inches. When well rooted, which will be in about four weeks, they may be removed to a cold pit or frame, and thence to the forcing-house as required; but care should always be taken that the bulbs are well rooted before beginning to force.

The best time for planting the general collection is in October, but for early forcing a batch may be planted in September. To keep the foliage dwarf, and perfect the colouring of the flowers, Hyacinths when growing should have a liberal supply of manure water, plenty of air, and be kept as near the glass as possible. A slight shade during the time of flowering will lengthen the period of blooming.

HYACINTHS IN BEDS OR BORDERS should be planted during the latter part of October or beginning of November, and even up to the end of January, in light rich soil, which should previously be dug to a depth of 18 inches, an addition of sharp sand being recommended if the soil is very heavy. The bulbs may be planted about six inches apart, and from four to five inches deep. A slight covering of small litter may be used with advantage in very exposed situations as a protection against severe weather.

HYACINTHS IN WATER.—The single varieties are more generally used for this purpose, as they produce finer spikes of bloom than the double. Fill the glasses, so as almost to touch the base of the bulb, with clear rain water, putting a small piece or two of charcoal in each glass, as this is of service in keeping the water pure, and gives some slight nourishment to the roots. After having filled the glasses, they should be placed in a cool dry dark place for a month or more till the roots nearly touch the bottom of the glass, when they may be brought gradually to the light, afterwards giving them plenty of light and air, but avoiding all draughts. Attention is required from time to time to keep a sufficient supply of water in the glass, and in looking over the bulbs while growing to brush off any fungus or decayed skin that may be on the roots or bulbs. The water does not require changing unless it begins to smell offensive, or the roots assume an unhealthy appearance. When of sufficient height, the flowers should be supported by wire to prevent them overbalancing.

ANEMONES.

Perhaps nothing during the past season has caused such a sensation as the several splendid and various forms of the Anemone. Two beds in our nursery have caused us to make special journeys to France, Belgium and Holland to purchase the best, and we possess unquestionably one of the finest stocks in England, and recommend these garden flowers to all our customers, feeling perfectly convinced that they will not only give a new feature but a grand display, and prove highly satisfactory to both buyer and seller.

From JOHN D. HARRY, Esq., The Palms, St. Julians, Malta, August 12th, 1883.

The Anemones you sent me last year were very beautiful, and surprised everyone.

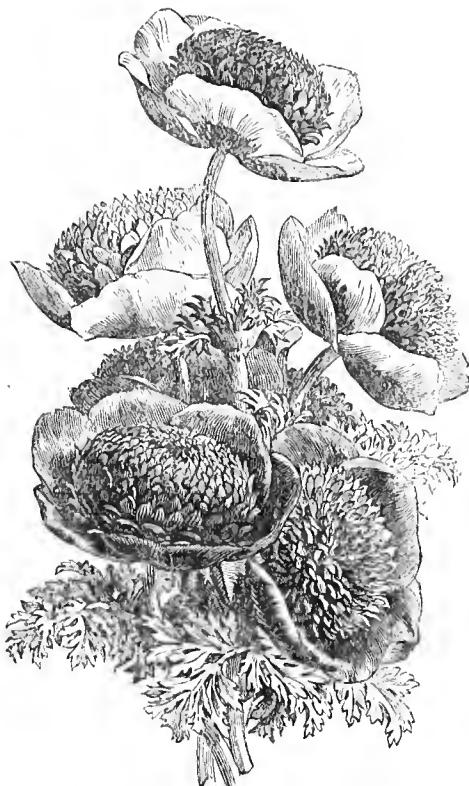

2. ANEMONE FULGENS DUPLEX.

5. ANEMONE, DOUBLE CHRYSANTHEMUM-FLOWERED.

3. ANEMONE, SINGLE FRENCH.

4. ANEMONE, DOUBLE FRENCH.

1. ANEMONE STELLATA FULGENS.

1. **Anemone stellata fulgens** (The Scarlet Windflower), flowers in spring, large dazzling vermillion-scarlet, produced in rapid succession for a considerable time. 9d. and 1s. each
2. **Anemone fulgens duplex** (Double Scarlet Windflower), habit of growth and time of flowering same as the above, excepting flowers being perfectly double, recommended as a splendid introduction. 2s. 6d. per doz.
3. **Anemone, Single French**, invaluable for the decoration of the garden, borders, massing, or for cutting purposes; and by successive planting they can be had in bloom from early spring until late autumn.
4. **Anemone, Double French**, splendid mixed.
5. **Anemone, Double Chrysanthemum-flowered**, these differ entirely from other double Anemones, the petals being regularly imbricated, like those of the Chrysanthemum-flowered Aster, very floriferous. Those not priced 1s. per doz.; 5s. to 7s. 6d. per 100.

RANUNCULUS ASIATICUS SUPERBISSIMUS.

New class and a very valuable acquisition. The flowers are nearly all double, and are white, flesh color red, rose, carmine, scarlet, purple, orange, yellow, &c., and are in full bloom from July to September. Most showy, different to the Persian or Turban; it should be found in every garden.

Per dozen, 1s. 6d. ; per 100, 10s.

DOUBLE RANUNCULUS.

	Per 100—s. d.						Per 100—s. d.					
Mixed Dutch	7	6	Mixed French	6	0

GLADIOLUS THE BRIDE.

Any ordinary garden soil will suit this excellent Gladiolus; it will form a most conspicuous object wherever planted. The flowers are of fine substance, perfect shape, and pure white.

Per dozen, 3s. ; per 100, 21s.

GLADIOLUS BRENCHLEYENSIS.

Our roots of this magnificent variety are extra fine and sound. Having a very large stock we are able to supply large quantities.

Extra large, 1s. 6d. per doz.; per 100, 8s.

GLADIOLUS NANUS.

(DWARF GLADIOLUS.)

Varying from the purest white to the darkest purple. Lower petals of most varieties are covered with broad dots and edged with dark red or purple. Very early flowering, and make charming specimens for the conservatory or all decorative purposes.

100 in 25 varieties, 22s. ; per dozen, 3s.

GLADIOLUS VILLE DE VERSAILLES.

A really beautiful variety, dwarf, and flowers produced most abundantly the beginning of June, the plant continues flowering until December. The flower is blush white, with very distinct large bright rose spots.

Per dozen, 10s.

GLADIOLUS.

(HARDY HYBRIDS.)

LEMOINEI, creamy white, lower petals dashed with rich crimson maroon
MARIE LEMOINE, this and the above are valuable for cut flowers, and of easy culture ; gives quite a new feature in every garden.

1s. each.

HYACINTHUS CANDICANS.

A lovely hardy bulb, flowering in August. Single flowers are very valuable for bouquet work ; colour white, and as many as 20 are produced on each spike.

8s. per dozen.

LILIUM AURATUM.

We receive consignments of this magnificent Lily direct from Japan, which we can offer at the reduced prices of

10s., 12s., and 15s. per dozen.

LILIUM TIGRINUM SPLENDENS.

Very large flowers, bright orange-scarlet colour, marked with large purple spots, of the greatest possible substance, large plump bulbs which will flower freely the first year after planting.

Each, 1s. ; per dozen, 10s.

SCHIZOSTYLLIS COCCINEA.

Brilliant coloured plant for decorative purposes during the winter, easily grown, flowers for several months in succession

Fine clumps, each, 1s. 2d. ; per dozen, 10s.

TIGRIDIA (OR TIGER FLOWER).

Natives of Mexico, producing flowers of exquisite beauty and singularly curious shape, the colour of each variety is gorgeous and finely contrasted ; they bloom from July to October. Before the frost, take up the bulbs, and keep in a dry place until the time of planting in the spring. The following are the most distinct and beautiful varieties.

TIGRIDIA PAVONIA GRANDIFLORA.

Tigridia pavonia grandiflora alba (new)—A grand new variety possessing all the advantages of the old varieties, both in vigour of growth and abundance of bloom, but with large ivory-white flowers, spotted with maroon and rosy lake in the centre, most beautiful when the bloom unfolds itself in the morning, recommended as a distinct and useful variety, 9d. each ; 7s. per doz.

Pavonia grandiflora—Rich scarlet, tinged and spotted with yellow.

Conchiflora—Orange and golden yellow, spotted with dark crimson.

Bulbs, 6d. each ; 5s. per dozen.

WINTER ACONITES.

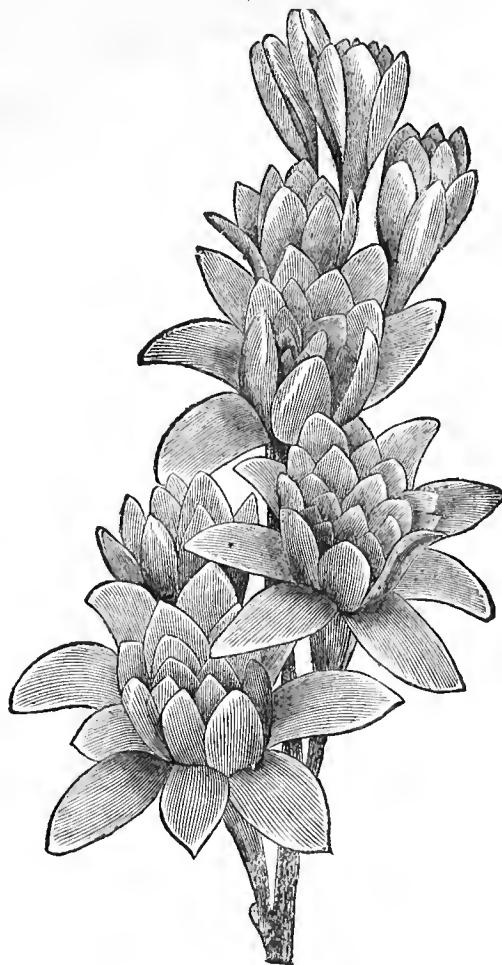

5s. per 100.

CHIONODOXA LUCILIÆ (The Glory of the Snow).

6d. each; 3s. per dozen; 20s. per 100.

VALLOTA PURPUREA (The Great Scarboro' Lily).

1s. to 2s. each.

AMERICAN TUBEROSE.

AMERICAN TUBEROSE (Double)—

For choicest Button-hole Bouquets, &c., no other flowers are of more value at all seasons than the Tuberose, and should be used in succession in every forcing-house during the winter.

2s. per dozen; 20s. per 100.

AFRICAN TUBEROSE (Double)—

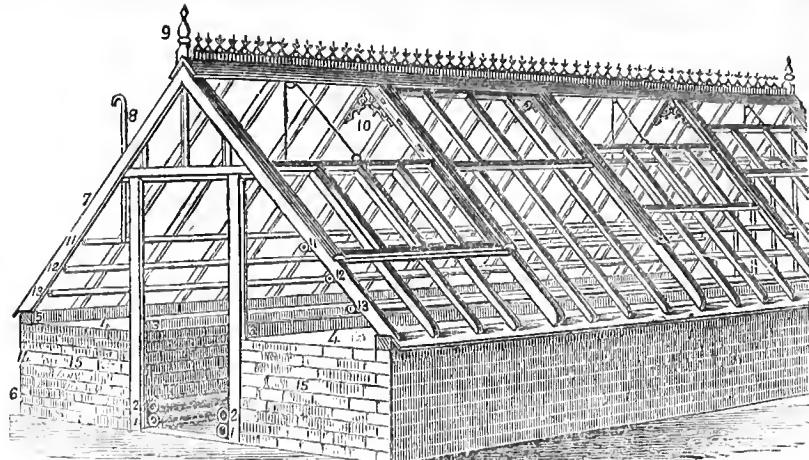

Direct from the Cape, have bloomed beautifully with us all the summer, and can highly recommend them.

3s. per dozen; 25s. per 100.

Papers and Essays.

Containing most valuable information for the guidance of all who wish to advance in gardening, and how to grow and raise plants to the highest perfection in pots.

By H. CANNELL, F.R.H.S., M.F.C., H.M.C.A.B., and others.

THE CHEAPEST AND BEST GREENHOUSE, AND HOW TO BUILD IT.

THE ART OF GARDENING, and the Natural Requirements of Plants, and How to Grow them to the Highest Perfection.

It treats on the following:—The feelings of plants, and how to treat them when undergoing any severe operations; the climate they require; how pot plants should be drained; how and when to water plants; how insects come, and how to exterminate them for a long time; and how plants ought to be when in perfection; the comfort that the amateur experiences in his garden. An illustration of a model greenhouse, with particulars how to construct the same in the most effectual and cheapest method known up to the present, with a great deal of other valuable information. *Free for 12 Stamps.*

SECONDLY—

H. CANNELL has taken more prizes and money at the London great shows for Fuchsias than anyone, and is acknowledged to have grown the best Fuchsias ever seen in London. H. C. will send every particular how to grow, show, and get the first prize. *Free for 7 Stamps.*

THIRDLY—

THE RUDIMENTS OF THE ART OF HYBRIDISING, and How to Improve our Florists' Flowers, &c.

This gives a plain statement how and when to cross and recross plants to get new and improved varieties. This ought to be read by all who have a greenhouse, for nothing can be more interesting than raising a few seedlings, and thereby improving the production of our plants. *Free for 7 Stamps.*

HOW TO GET THE FIRST PRIZE FOR TRICOLOR AND BICOLOR PELARGONIUMS, and every particular How to Grow and Show them.

Sent post free for 7 Stamps. The whole sent post free for 1s. 6d.

We have the largest and best collection of FLORISTS' FLOWERS (soft-wooded plants) and their SEEDS in Europe, always ready to be sent to all parts of the world, either by post or otherwise. See "FLORAL GUIDE," sent free for 12 stamps.

H. CANNELL & SONS'

COVENT GARDEN BOUQUETS,

OF EVERY DESCRIPTION AT THE ACTUAL GROWERS PRICES.

It is of the utmost importance to all who require Wedding and other Bouquets, and cut flowers, that they should have them direct from the growers at wholesale prices, no flowers are grown in Covent Garden, it is therefore obvious that the distance is the same, any quantity can be packed so as to travel safe, and as the LONDON, CHATHAM, & DOVER is in direct communication with all the other Railways, punctuality can be safely relied upon. In giving orders it is necessary that plenty of time is allowed, and that the actual object required is distinctly stated; no set price can be stated, as that differs so materially with the season. Button-holes sent regularly by post.

Extract from "*Greenwich Observer and Kentish Mail.*"

THE BOUQUET FOR THE PRINCESS OF WALES.—"The very wet weather on Saturday last completely interfered with the ceremony of laying the foundation stone of the new Homes for Little Boys and Orphans at Swanley, and all arrangements were postponed for another and, we trust, a finer day. We have been favoured with an inspection of the bouquet prepared for presentation to the Princess, which, failing of its Royal destination, was afterwards given to a lady who lives at St. John's. It consisted of the most choice collection of Gloxinias which the noted florists, Messrs. Cannell, of Swanley, could produce, with a garland of exquisite Maiden-hair Ferns, interspersed with a kind of Double Jessamine, the aroma of which was most delicate. The pureness of the white waxy bells and the rich splashes of the Gloxinias, with the grace and delicacy of the Ferns, lent a perfect charm to the bouquet, fit indeed for the hand of Her Royal Highness, and reflecting great credit on Messrs. Cannell. We never saw anything more artistic and so exquisitely simple and graceful."

Frequent Trains (London, Chatham, and Dover Railway) from Victoria, Holborn Viaduct, Ludgate Hill, Elephant and Castle, Brixton, Loughboro' Junction, and Herne Hill.

CANNELL & SONS'

"REAL MANURE," OR FOOD FOR PLANTS.

1 lb. tin, 1s.; 3 lb. tin, 2s. 6d.; 6 lb. tin, 4s. 6d.

SPECIAL PRICES FOR LARGER QUANTITIES IN BAGS, AND ALSO PER GWT. FOR THE GARDEN.

From Mr. J. WARD, NEW WALK, BEVERLEY, June 9th, 1882.

Sir,—Your Plant Invigorator is the best plant manure I have ever used.

*From Mrs. COULBOURN, LILLY VILLA, VICTORIA PARK, MANCHESTER,**19th April, 1882.*

My gardener, who thought my ordering "Real Manure" quite superfluous, saying "Every gardener had his own, and one does as good as another," came to me yesterday, saying I was quite right in insisting he should try yours, and that in the ten days he had used it for certain plants as I directed he could see a marked improvement. He is quite a convert.

*From Mrs. JANE COULBOURN, LILLY VILLA, VICTORIA PARK, MANCHESTER,**July 8th, 1882.*

We like your "Real Manure" so much that we shall be glad to know how you sell it in large quantities.

THE BEST SAND FOR FLORICULTURAL PURPOSES IS SEA SAND.

From innumerable proofs it is quite certain that Sea Sand is by far the best for all Horticultural purposes, we have used no other for the last three years; and just as it comes from the sea shore and the fresher the better, the salt giving vigour to all plants.

1 Cwt., 2s.; 5 Cwt., 7s. 6d.; Half-ton, 12s.; 1 Ton, £1.*In truck at Swanley Station.*

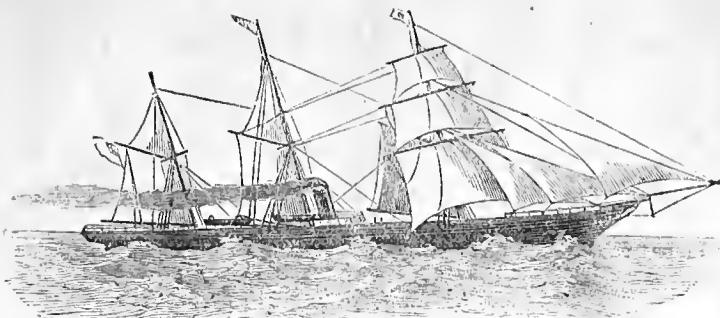

Gardeners' Chronicle.—"SEA SAND FOR CUTTINGS.—Mr. Cannell calls our attention to the value of this material for striking cuttings, and certainly the sample of Coleus he sends, some struck in Sea Sand, some in ordinary pit sand, shows the superiority is with the Sea Sand. We are assured that the sand has been in no way prepared prior to using, so that the notable quantity of salt it must contain cannot have injured the plant, nay, in some cases it may have a distinct mammal value."

Tobacco Paper and Cloth for Fumigation.

Of our own manufacture, free from injurious properties to plants. For full particulars how to use it, and to exterminate the Green Fly, see "CANNELL'S ART OF GARDENING," sent post free for 10 Stamps.

1s. 2d. per lb.; 5 lbs., 5s. 6d.; 10 lbs., 10s.; 28 lbs., 26s.*From Mr. ROBERT GIRLING, UNION HOUSE, GRESSENHILL, EAST DEREHAM,*

I fumigated my house of plants, Vines, &c., according to your directions with the Tobacco Cloth or Rag supplied by you the beginning of last March, and I have not seen the symptoms of green fly, thrip, or red spider since, therefore I can and must say it is the most efficacious and best remedy I ever used.

FOREIGN TESTIMONIALS.

From Messrs. CROSSMAN, BROS., Rochester, New York, U.S.A., *August 21st.*
The Seeds you sent us done exceedingly well.

From ARTHUR PERRY, Esq., Timaru, Canterbury, New Zealand, *July 4th, 1883.*
The Primulas raised from the Seed I had from you last year are now in flower, and they are without exception the finest lot I have ever seen. Your Single Cinerarias are also very good.

From W. P. SIMMONS & Co., Geneva, O., U.S.A., *July 30th, 1883.*
In spite of the hot weather the last lot of plants you so kindly mailed me came through in fine shape.

From JOHN PATTERSON, Esq., Solicitor and Notary Public, Tamworth, N. S. Wales,
May 26th, 1883.

I am glad to inform you that the Pelargoniums you sent me by post arrived in excellent condition, not only did they survive their incarceration by post (about forty-six days), but they had actually made several strong shoots.

From Mr. N. RONALDS, Brighton Nursery, New Street, Melbourne, Victoria,
September 25th, 1882.

I beg to acknowledge the receipt of two packages of Seeds by the August mail, also one case with Narcissus Bulbs by the September mail, which arrived in splendid condition, as sound as when you packed them in dear old England. The steamer made a splendid trip (forty-two days).

From Mr. J. L. BRIERLY, 209, Union Street, Worcester, Mass., U.S.A.,
September 3rd, 1883.

I received your two packages of Plants all right. Many thanks for your prompt and very liberal dealing. I like your mode of packing very much.

From Mrs. J. PHILLIPS, Matukana, New Zealand, *November 28th, 1882.*

I was very much surprised as well as pleased at receiving a rooted cutting of the *Lapageria rosea*, it is doing remarkably well, for which accept my best thanks. The Seeds were nicely selected, and are all growing well; it is a great pleasure for me to watch them, knowing they will turn out good. Thank you for your liberal supply.

From WALTER COLES, Florist, Claymont, Del., America, *January 8th, 1883.*

I must drop you a line to inform you the Chrysanthemums I got from you last summer have done first class, and were admired by all who saw them.

From J. NEWLAND, Esq., Ngaroto, Waikato, Auckland, New Zealand, *December 28th, 1882.*

Your Seeds are good. Sweet Williams are the finest collection I ever saw, really magnificent. Digitalis, Pansies, and Antirrhinum fine.

From Mr. H. MATTOCK, Gardener to E. J. PRICE, Esq., Wolseley, Quebec, Canada,
January, 1882.

I am very pleased to inform you that I took two First Prizes with the Dahlias you sent me last year, and also with your Zonal Geraniums, at the Quebec Horticultural Show last year.

From J. EVERAERTS, Esq., Antwerp, Belgium, *April 2nd, 1883.*

Plants and Seeds received in excellent condition.

From A. K. MORSON, Esq., West Maitland, *via* Sydney, *February 2nd, 1883.*

Your Geraniums have all done well, and thrive in this climate magnificently.

From Mr. F. J. BARKER, Arahura Nursery, Hokitika, New Zealand, *February 22nd, 1883.*

The Plants by post came to hand in grand condition, and I have now a nice little stock of many of them.
